

PAPIR IN KARTON Z ZAŠČITNIMI ELEMENTI

Papir ali karton je lahko sestavljen iz 100 % beljenih celuloznih sulfatnih listavcev in / ali iglavcev ali iz 100 % bombažnih vlaken oziroma mešanice le teh.

Na željo stranke je možna vgradnja različnih zaščitnih elementov v papir ali karton, ki omogoča ustrezno zaščito pred ponarejanjem. Primeri zaščite so:

- Zaščitna vlakna (vidna ali nevidna, fluorescentna)
- Zaščitne planšete
- Kemična zaščita (reaktivnost na topila, oksidante, kisline, baze)
- Vodni znak (eguterski tip)

Zaradi zaščitnih elementov se lahko papir ali karton uporablja za dokumente, diplome, certifikate in dopise.

Lastnost papirja in kartona se določi po dogovoru s stranko glede na vrsto uporabe in tehniko tiska. Najpogostejša izdelava gramature je 80 g/m² za dopise in 210 g/m² za diplome.
